To Whom It May Concern:

Amega Development Group Inc. contracted Valley Pool and Spa to complete the construction and commissioning of the pool facilities at *Water Street by the Park*, a residential tower development in Kelowna, British Columbia.

The project required coordination within a large, multi-trade construction environment and adherence to defined schedule, budget, and quality requirements. Valley Pool and Spa completed their scope in accordance with these requirements and integrated effectively with the construction management team, consultants, and other trade contractors.

Throughout the project, Valley Pool and Spa demonstrated strong technical capability and a practical approach to problem solving. Their team excelled in identifying and addressing any issues in a timely manner, contributing to the efficient progression of work on site.

Valley Pool and Spa's management and site personnel conducted themselves professionally and maintained clear communication with all project stakeholders. Their cooperation and responsiveness supported the successful construction of the amenity spaces.

Based on our experience of this project, Amega Development Group Inc. would highly recommend Valley Pool and Spa for similar residential or mixed-use developments.

Regards,
